##ÿÿ#####ÿÿ#d#####Z#(#####i0bjectivesThis ACTD is a joint Navy/Army demonstration to focus on improving in-flight safety and maintenance reliability of helicopters. The participants will coordinate with industry, including the Rotorcraft Industry Technology Association (RITA), in defining common industry health and usage monitoring standards and architectures.TechnologyThis ACTD will evaluate technologies which focus on reducing life cycle costs, improving system safety and performance, increasing operational availability, and streamlining maintenance and logistic infrastructure in the Army and Navy helicopter communities.Lead Service and User SponsorThe Navy will be the lead Service and the User Sponsor for this ACTD. ScheduleSystem development and planning will occur over FY 97. Integration of the system aboard six H-60 and six H-47 helicopters will be performed in FY 98. System flight test and data collection will occur in FY 99.##
